

Cyber Security Awareness Presentation

Mr. Deepak (DJ) Jain is president of Computel Systems, Inc. in Charlotte. Computel has been in business of selling IT equipment for the last 18 years dealing with some of the largest corporations in USA and abroad. Prior to joining Computel Mr. Jain was corporate services marketing manager for six years based in Boston working for HP/Digital and sales manager for Digital Equipment Corp. in Toronto, Canada for 12 years.

Mr. Jain has consulted with many national and international clients on cyber security, having trained in and developed a layered approach to Cyber Security called “Quad Core Protection” believed to be the most effective & comprehensive solution in dealing with the modern day threats. Although absolute protection is elusive in the cyber world but, with a layered approach and using advanced technologies you can minimize your vulnerability and not be a low hanging fruit for cyber criminals. We believe it is possible to improve your security posture and reduce your threat level without going overboard on your IT budget.

Today’s presentation will include some of the hot topics such as “**Bring Your Own Device**”, Social Engineering & its impact on Cyber security and a discussion on the effectiveness of Next Generation Fire Walls. All attendees will also receive E-book “BYOD for Dummies” and a cheat sheet on Social Engineering.
